

Proflush® Professional Compact

Why buy the Proflush Professional Compact?

The Proflush Professional Compact machine is ideal for someone that doesn't require the bulk and power output of our Professional machine.

Where cost is of utmost importance but you still have to comply with current legislation the Professional Compact fits the bill. It is best practice to clean the system before fitting a new boiler to meet boiler manufacturer's recommendations and comply with warranty & current legislation.

The Professional Compact is very easy to operate and comes as standard with a faceplate diagram to assist you whilst on site. The machine also comes equipped with snap on/snap off 3/4" Camlock Connection making it quick and easy to connect up to a system.
